

The Brown Advisory Sustainable Core Fixed Income strategy seeks to deliver risk-adjusted returns by incorporating ESG factors into our investment research. We believe this strengthens our bottom-up, credit-focused approach, with both fundamental and sustainable factors playing a role in our due diligence process and our ultimate decision to purchase bonds.

### SUSTAINABILITY PROFILES FOR CORPORATE HOLDINGS (AS OF 06/30/2017)

COMPANY	SUSTAINABILITY DRIVERS
AvalonBay Communities, Inc.	AvalonBay redevelops infill site and conducts urban revitalization and brownfield projects that were formerly industrial sites. This offers residents more options for sustainable living, from green building and walkable neighborhoods to better transit and bike-commuting alternatives.
Albemarle Corporation	Specialty chemical firm Albemarle has an attractive long-term opportunity for supplying lithium used in various energy storage applications in electric and hybrid vehicles as well as renewable grid integration. It has long-term lithium supply contracts and experienced 31% sales growth in 2016 that was driven primarily by demand for battery-grade lithium salts.
American Tower Corporation	American Tower is one of the largest wireless tower operators; its strong environmental compliance track record, focus on driving alternative energy into its remote tower base and its work to reduce carrier's dependence on highly inefficient generators has earned the company a strong reputation in international markets and helped it gain market share.
Analog Devices, Inc.	Analog Devices is an industry leader in water conservation with extensive water reuse and conservation programs across their manufacturing sites. It is monetizing opportunities in various cleantech markets by providing integrated circuits to renewable energy firms, energy metrology components for smart meters and technologies for smart grid applications.
AstraZeneca	AstraZeneca has a robust sustainability framework based on five core pillars: access to health care, environmental sustainability, great place to work, responsible research and ethical business practices. Since 2010 it has reduced its carbon footprint by 21%, total waste by 18% and water consumption by 14%.
Ball Corporation	Packaging firm Ball Corporation has gained share in its markets with its metal packaging solutions (metal packaging weighs less and is highly recyclable compared to alternatives such as glass). Ball has been able to reduce the weight of its 12 ounce aluminum can by 40% since the 1970s through design innovations. This has helped many of its global beverage customers achieve their own sustainability goals.
Bank of America Corporation (Green Bond)	Bank of America has provided more than \$53 billion in financing for low-carbon activities since 2007 and for the past four years has been the number one underwriter of green bonds. It seeks to up its commitment to low-carbon-related business from \$50 billion to \$125 billion by 2025 through lending, investing, raising capital, advisory services and developing financing solutions. Green bond proceeds are funding renewable energy and energy efficiency projects.
Becton, Dickinson and Company	Becton Dickinson is an industry leader in addressing access to health care for underserved populations, particularly with respect to affordable pricing partnerships and technology access. It has established equitable pricing schemes in partnership with organizations that led to pricing geared toward affordability, with prices discounted 75% in developing countries compared to its prices in developed markets.
Boston Properties, Inc.	Boston Properties is a REIT that has strong green building targets, operational policies and tenant engagement activities, which include minimum Silver LEED ratings for new buildings and major extensions. It has one of the most comprehensive LEED professional training programs in the industry for 75% of construction and property management staff and triple net leasing.
Campbell Soup Company	Campbell Soup Company was the first major food company to support mandatory national labeling standards for products that may contain GMOs. It has strong integration with its supply chain partners, and it has motivated more than 60% of its agricultural suppliers to adopt drip irrigation to conserve water.
The Clorox Company	Clorox proactively phases out substances that raise consumer and regulatory concerns. Its Green Works line of sanitary and cleaning products uses natural, plant-based or biodegradable ingredients; currently this product line holds a leading U.S. market share in the eco-friendly cleaning products segment.
Ecolab, Inc.	Ecolab is a leading provider of cleaning, food safety and health protection products and services. The company helps its customers cut energy and materials costs, improve efficiency and boost bottom-line results.
Equinix, Inc.	Equinix, a data-center REIT, is a global leader in energy efficiency and emissions reduction. It has targets for LEED certification in all of its data centers and has a committed goal of powering its centers with 100% clean and renewable energy.

## SUSTAINABILITY PROFILES FOR PORTFOLIO HOLDINGS (CONTINUED)

COMPANY	SUSTAINABILITY PROFILE
Equinix, Inc.	Equinix, a data-center REIT, is a global leader in energy efficiency and emissions reduction. It has targets for LEED certification in all of its data centers and has a committed goal of powering its centers with 100% clean and renewable energy.
The Goodyear Tire & Rubber Company	One of the world's leading tire companies, Goodyear has a well-established environmental, health and safety & sustainability strategy to reduce its environmental impact across its products' lifecycles. In 2006 it created a Zero Waste to Landfill initiative which required all manufacturing plants to reduce, reuse and recycle manufacturing waste.
J.B. Hunt Transport Services, Inc.	J.B. Hunt is a leader in intermodal transportation services (i.e. moving freight via a combination of railroad and trucking). The company helps its customers achieve meaningful fuel-cost savings and reduced carbon emissions compared to trucking-only shipping solutions.
Kaiser Foundation Hospital	Kaiser is committed to sustainability and has long-term environmental stewardship goals to guide the organization's sustainability efforts through 2025. It pledges that by 2025 it will become "carbon net positive" by purchasing clean energy and carbon offsets to remove more greenhouse gases than it emits. It will support sustainable agriculture by purchasing food from local producers that use sustainable practices, it will recycle, reuse or compost 100% of its non-hazardous waste, and reduce the amount of water it uses by 25% per square foot of buildings.
Keysight Technologies, Inc.	Keysight Technologies, Inc. provides electronic design and test solutions to communications and electronics industries. It has been able to capitalize on opportunities for growing in the clean tech market by focusing on providing power management technologies that include batteries, power supplies, power meters and sensors that enable the energy normally consumed to be returned to the grid cleanly, saving costs from energy consumption and cooling, while not interfering with the grid.
MidAmerican Energy (Green Bond)	MidAmerican is a regulated utility and recognized as a leader in the use and development of renewable energy. No other U.S. rate-regulated utility owns more wind-powered generation capacity. Green bond proceeds are financing expenditures for the firm's 551mw Wind X and 2,000mw Wind XI projects, both located in Iowa. Upon completion, MidAmerican will have invested \$10.3 billion building over 6 gigawatts of wind-powered generation capacity—equivalent to approximately 90% of its Iowa retail customers' annual consumption.
Morgan Stanley (Green Bond)	Morgan Stanley has a growing focus on sustainability which is not only reflected in its core values, but also in the increasing role that sustainability issues play in global finance. Green Bond proceeds are funding renewable energy projects and energy efficiency investments.
Regency Centers Corporation (Green Bond)	Regency has a green leasing scheme to decrease operation and management costs and targets to use LEED standards in all current and new developments. Green Bond proceeds are being used to finance Regency's new and existing properties to ensure LEED certification.
Starbucks Corporation (Sustainability Bond)	Starbucks' image as an environmentally progressive firm has always been a key component of its brand. It backs up this image with substance: for example, it built its comprehensive CAFÉ purchasing program from the ground up, in order to encourage fair trade and organic practices among a large and ever-growing portion of its coffee-supplier network.
Tenneco, Inc.	Tenneco is a leading producer of original and after-market automotive components, with a product line that focuses on ride-control and emissions/clean air technologies. A pioneering designer of clean-air solutions for vehicles, Tenneco's products support gasoline, gasoline direct injection, flex-fuel and diesel applications. Its suite of clean air technologies are specifically designed to lower emissions of NOx, particulate matter mass and number, hydrocarbons and CO2.
Verisk Analytics, Inc.	Verisk is a leading provider of climate and environmental-risk data to the insurance and reinsurance industries. Its climate data provision segment was once a small sideline that provided data to the government, but has now grown into a thriving business for Verisk, with growth fueled by strong demand from insurers around the world.
