

# LARGE-CAP GROWTH REVIEW AND OUTLOOK

Optimism won the day as U.S. markets seemed to have all but ignored geopolitics, generating robust returns in 2019. Trade relations with China remain top of mind for investors, but historically low unemployment and a healthy U.S. consumer helped offset these concerns. Despite trailing the benchmark in the fourth quarter, the Large-Cap Growth strategy delivered another year of attractive performance in both absolute and relative terms, on the back of superior stock picking. There were no material fundamental issues with any of our holdings, and the underperformance in the quarter was primarily attributable to stocks taking a breather and not holding pace with the benchmark. Forward price-to-earnings multiples for the broad market indices expanded over the course of the year, as price appreciation was not matched with a corresponding increase in earnings expectations. The portfolio's multiple expanded as well, but not nearly to the same extent as the benchmark, given the portfolio benefited from fundamental support in the form of increased earnings expectations.

Despite trailing the benchmark on a relative basis for the fourth quarter, the portfolio's health care sector finished off the year on a strong note. During the quarter, investors migrated into lower-growth names, such as managed care, which had been underperforming year to date. Our confidence in the companies we own remains high. Be it the device companies that we hold or the best-in-class diagnostic distributors fueling medical research, these companies all offer a differentiated products and or services to their customers. Edwards Lifesciences and DexCom are examples of companies that are improving patient outcomes and pushing the overall cost curve lower at the same time. We view this as a win-win for patients and a health care system beleaguered by escalating costs.

While we believe our investment approach has withstood the test of time, there are episodic events that are very helpful in reinforcing specific aspects of our investment process. The performance of the technology sector in 2019 is precisely one of these periods. The

technology sector led the market last year and was the only outperforming sector in the benchmark. Our technology holdings performed quite well, up 44% for the year and 11.3% for the quarter. However mega-cap stocks, such as Apple, which as of year end comprised 8.5% of the index, drove a large percentage of the benchmark returns for the quarter and the year. The company does not meet the growth criteria for this strategy. Given its size, it created a material headwind, but not an insurmountable one. On the other hand, Microsoft, which has been a solid contributor to the portfolio, was also a drag on a relative basis, given its 7.8% benchmark weight. We maintain a 5% maximum position size limit, which can put the mega-cap names, even those that we quite like, at a structural underweight. We have no plans to relax the essential portfolio risk controls in order to match the benchmark weight for an individual stock. There are many other stocks in technology and otherwise that are making strong contributions to the portfolio's performance. The fact that the portfolio was able to outperform in a very narrow market environment reinforces our view that investors do not need to bear the excessive risk of an oversized position in a single business model in order to outperform.

Swap activity from existing names into new ones declined over the course of 2019 as compared to last year. This is consistent with historical patterns for the strategy. Our pipeline of above-average growth business models remains robust, and we are prepared to take action should we see dislocations in the marketplace. As always, we continue to optimize the capital within the portfolio into those stocks that we believe are offering the most favorable risk versus reward prospects.

# SECTOR DIVERSIFICATION

- We trimmed a number of technology holdings based on strength to fund a new position this quarter. Technology is the largest sector weight in the portfolio but remains the largest underweight relative to the benchmark. The technology sector in the Russell 1000® Growth Index gained more than 50% last year and is approaching 40% of the benchmark.
- We have also been actively trimming some of our health care holdings that performed well during the year. The sector remains the largest portfolio overweight, as we reallocated some of this capital into Illumina, which is a recent addition to the portfolio.

- Consumer discretionary was the top contributor on a relative basis, primarily due to Alibaba, which rebounded this quarter. Despite posting attractive results, Alibaba had been trading at a discount to its historical valuation multiple as investors remain wary about the Chinese economy.
- Technology was the biggest drag on relative performance for the fourth quarter. For the most part, the portfolio holdings did quite well. However, Apple and a number of the large weights in the Index's technology sector were up significantly.

- Health care was the top contributor in 2019. All of the portfolio holdings made positive contributions this year, and Intuitive Surgical was the only underperformer on a relative basis. While the company continues to post solid results, the stock was up more than 23% this year and is up 179% over the last three years.
- Technology stocks had quite the run in 2019, especially mega-cap stocks, such as Apple and Microsoft, which accounted for nearly one-quarter of the Russell 1000® Growth Index's return for the year. The technology segment of the portfolio did quite well but did not keep pace with the benchmark, creating a drag on relative performance.

Fourth Quarter 2019

## QUARTER-TO-DATE TOP FIVE CONTRIBUTORS TO RETURN

Representative Large-Cap Growth Account Top Five Contributors

	NAME	DESCRIPTION	AVERAGE WEIGHT (%)	RETURN (%)	CONTRIBUTION TO RETURN (%)
DXCM	Dexcom Inc.	Manufactures and markets medical devices and glucose monitoring systems	3.20	46.63	1.29
ADSK	Autodesk Inc.	Designs and develops multimedia software products	3.28	24.21	0.75
MSFT	Microsoft Corporation	Develops, manufactures and distributes software products	4.78	13.83	0.65
BABA	Alibaba Group Holding Ltd. Sponsored ADR	Operates as an online and mobile commerce company	1.97	26.83	0.49
TMO	Thermo Fisher Scientific Inc.	Develops, manufactures and markets analytical and environment monitoring instruments	3.88	11.68	0.45

- DexCom reported the strongest quarterly results in the history of the company. DexCom turned in 53% revenue growth in the U.S., which handily beat expectations.
- Autodesk reported a strong quarter, and the stock moved higher as fears of a global manufacturing slowdown proved to be overblown.
- Microsoft continues to execute at a high level, with revenue growth for the most recent quarter running at 15% constant currency and profit margins exceeding expectations.
- Alibaba continues to produce robust results despite a sluggish Chinese economy and unrest in Hong Kong.
- Thermo Fisher beat expectations due in part to China, which continues to grow organically in the low teens. We believe that its technological leadership in life science solutions place the company at a significant advantage over its competitors.

It should not be assumed that investments in such securities have been or will be profitable. References to specific securities are for illustrative purposes only and do not represent all of the securities purchased, sold or recommended for advisory clients. The portfolio information provided is based on a representative Large-Cap Growth account and is provided as supplemental information. Top five contributors exclude cash and cash equivalents. The security returns listed represent the period of when the security was held during the quarter. Contribution to return is calculated by multiplying a security's beginning weight in the portfolio by the security's return on a daily basis, and geometrically linking the return for the reporting period. Please see disclosure statements at the end of this presentation for additional information and for a complete list of terms and definitions.

Fourth Quarter 2019

## YEAR-TO-DATE TOP FIVE CONTRIBUTORS TO RETURN

Representative Large-Cap Growth Account Top Five Contributors

	NAME	DESCRIPTION	AVERAGE WEIGHT (%)	RETURN (%)	CONTRIBUTION TO RETURN (%)
DXCM	Dexcom Inc.	Manufactures and markets medical devices and glucose monitoring systems	2.95	82.58	2.31
ZTS	Zoetis Inc. Class A	Develops animal vaccines and prescriptions medicines	4.34	55.55	2.20
MSFT	Microsoft Corporation	Develops, manufactures and distributes software products	4.37	57.53	2.18
SBAC	SBA Communications Corp. Class A	Functions as real estate investment trust	4.00	49.32	1.90
V	Visa Inc. Class A	Operates as a global payments technology	4.43	43.37	1.87

- Unfounded fears that the market for continuous glucose monitors was becoming saturated held DexCom's stock in check during the first part of the year. As it became clear that this was not the case and DexCom sales climbed dramatically, the stock reacted in concert.
- Zoetis boasts a best-in-class portfolio of drug therapies for both companion and production animals. The company posted another year of strong fundamental performance. We continue to see upside with the launch of a new category drug next year.
- We believe Microsoft continues to demonstrate the ability to compete effectively across product segments against smaller and more nimble competitors, and against large market leaders, such as Amazon Web Services.
- Despite the overhang from the ongoing Sprint/T-Mobile merger litigation, tower operator SBA Communications benefits from low interest rates and increasing 5G spending as carriers begin building out their coverage.
- Robust consumer spending proved to be a nice tailwind for Visa. We continue to see the long-term trend play out as transaction volume moves from cash to card and e-commerce continues to grow.

Fourth Quarter 2019

## QUARTER-TO-DATE BOTTOM FIVE CONTRIBUTORS TO RETURN

Representative Large-Cap Growth Account Bottom Five Contributors

	NAME	DESCRIPTION	AVERAGE WEIGHT (%)	RETURN (%)	CONTRIBUTION TO RETURN (%)
INTU	Intuit Inc.	Provides software products for businesses	3.14	-1.31	-0.05
ROP	Roper Technologies Inc.	Provides engineering products and solutions for global niche markets	3.56	-0.53	-0.04
LHX	L3Harris Technologies Inc.	Develops aerospace and defense technologies	0.89	-2.34	-0.04
SBAC	SBA Communications Corp. Class A	Functions as real estate investment trust	4.05	0.09	-0.01
CTAS	Cintas Corporation	Provides rental and servicing of uniforms and other garments	3.04	1.36	0.03

- Intuit pulled back modestly on the heels of a big first half of the year. Fundamentally, we believe the company is executing well; however, the stock took a bit of breather in the fourth quarter.
- Roper took a breather as well after a very strong first-half run. The company experienced a bit of weakness in some segments that are short cycle in nature.
- We initiated a new position in L3Harris this quarter as the stock drifted lower.
- SBA Communications' run cooled a bit during the quarter as investors await the outcome of the Sprint/T-Mobile merger trial.
- Cintas reported results late in the quarter. The results were good, but the stock response was muted.

Fourth Quarter 2019

## YEAR-TO-DATE BOTTOM FIVE CONTRIBUTORS TO RETURN

Representative Large-Cap Growth Account Bottom Five Contributors

	NAME	DESCRIPTION	AVERAGE WEIGHT (%)	RETURN (%)	CONTRIBUTION TO RETURN (%)
LHX	L3Harris Technologies Inc.	Develops aerospace and defense technologies	0.23	-2.34	-0.04
ILMN	Illumina Inc.	Develops, manufactures and markets integrated systems for the analysis of genetic variation and function	0.92	8.54	0.21
BKNG	Booking Holdings Inc.	Provides online travel and related services	2.69	19.24	0.55
FTV	Fortive Corp.	Owns and operates industrial units that manufacture testing and measurement equipment	2.98	13.33	0.60
FLT	FleetCor Technologies Inc.	Manages and processes commercial fuel cards	0.79	54.99	0.78

- L3Harris is a new addition to the portfolio. The company was down modestly when the portfolio began building out its position in the name.
- Illumina reported a messy quarter, sending the stock down significantly. The portfolio began building its position in the stock on this weakness.
- While Booking.com underperformed the broader market this year, the company has differentiated itself from its peer online travel companies, some of which were down materially. We continue to have confidence that its business model has excellent growth potential, and the stock is trading at a compelling valuation.
- As investors started to become wary of cyclically exposed business models, Fortive pulled back midyear. The stock has begun to recover, and the company announced plans to spin off some of the segments that are the most exposed to industrial cycles.
- The portfolio exited its position in FleetCor, taking advantage of the appreciation in stock price to invest in a more compelling idea.

Fourth Quarter 2019

## QUARTER-TO-DATE ADDITIONS/DELETIONS

Representative Large-Cap Growth Account Portfolio Activity

- We initiated a new position in L3Harris this quarter. A merger of equals between Harris and L3 spawned the sixth largest defense contractor. We believe this complementary merger should result in both cost and revenue synergies as the company scales up its product platforms in both defense and commercial end markets. The combined company offers leading-edge technology in electronic warfare, communication systems, space and avionics. The combination should also enable the company to capture a greater share of contracts going forward.

The **Average Weight** of a position or sector refers to the daily average for the period covered in this report of a stock's value as a percentage of the portfolio.

The **Total Return** of an equity security is the sum of the return from price movement and the return due to dividend payments or other sources of income. Standard benchmark-, sector- and portfolio-level returns are the sums of the weights of each security multiplied by its return, summed and calculated daily and summed over the period covered by the report or by an otherwise-noted period.

**Allocation Effect** measures the impact of the decision to allocate assets differently than those in the benchmark.

**Selection and Interaction Effect** reflects the combination of selection effect and interaction effect. Selection effect measures the effect of choosing securities that may or may not outperform those of the benchmark. Interaction effect measures the effect of allocation and selection decisions (i.e., did we overweight the sectors in which we underperformed).

**Total Effect** reflects the combination of allocation, selection and interaction effects. Totals may not equal due to rounding.

**Contribution To Return** is calculated by multiplying a security's beginning weight in the portfolio by the security's return on a daily basis, and geometrically linking the return to the reporting period.

**Market Capitalization** refers to the aggregate value of a company's publicly traded stock. Statistics are calculated as follows: Weighted Average: the average of each holding's market cap, weighted by its relative position size in the portfolio (in such a weighting scheme, larger positions have a greater influence on the calculation); Weighted Median: the value at which half the portfolio's market capitalization weight falls above and half falls below; Maximum and Minimum: the market caps of the largest and smallest companies, respectively, in the portfolio.

**Price-Earnings Ratio** (P/E Ratio) is the ratio of the share of a company's stock compared to its per-share earnings. P/E calculations presented use FY2 earnings estimates; FY1 estimates refer to the next unreported fiscal year, and FY2 estimates refer to the fiscal year following FY1.

**Earnings Growth 3-5 Year Est.** is the average predicted annual earnings growth over the next three to five years based on estimates provided to FactSet by various outside brokerage firms, calculated according to each broker's methodology.

**P/E / Growth Ratio**, or **PEG Ratio**, is the ratio of a portfolio's P/E Ratio divided by its Est. 3-5 Yr. EPS Growth rate.

**Dividend Yield** is the ratio of a stock's projected annual dividend payment per share for the fiscal year currently in progress, divided by the stock's price.

**Portfolio Turnover** is the ratio of the lesser of the portfolio's aggregate purchases or sales during a given period, divided by the average value of the portfolio during that period, calculated on a monthly basis. Portfolio turnover is provided for a three-year trailing period.

**Weighted Median** refers to the 50% weighted percentile of a sample.

**Weighted Average** (Weighted Mean) refers to when data points in a sample contribute more to the final mean than others.

All of the above ratios for a portfolio are expressed as a weighted average of the relevant ratios of each portfolio holding, EXCEPT for P/E ratios, which are expressed as a weighted harmonic average.

Fourth Quarter 2019

# LARGE-CAP GROWTH INSTITUTIONAL COMPOSITE

Year	Composite Total Gross Returns (%)	Composite Total Net Returns (%)	Benchmark Returns (%)	Composite 3-Yr Annualized Standard Deviation (%)	Benchmark 3-Yr Annualized Standard Deviation (%)	Portfolios in Composite at End of Year	Composite Dispersion (%)	Composite Assets (\$USD Millions)*	GIPS Firm Assets (\$USD Millions)*
2018	5.9	5.5	-1.5	13.0	12.1	88	0.3	9,285	30,529

2008	-35.7	-36.3	-38.4	16.5	16.4	32	0.3	120	8,547

Brown Advisory Institutional claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Brown Advisory Institutional has been independently verified for the periods from January 1, 1993 through December 31, 2018. The Verification reports are available upon request. Verification assesses whether (1) the firm has complied with all the composite construction requirements of the GIPS standards on a firm-wide basis and (2) the firm's policies and procedures are designed to calculate and present performance in compliance with the GIPS standards. Verification does not ensure the accuracy of any specific composite presentation. GIPS® is a registered trademark owned by CFA Institute.

- \*For the purpose of complying with the GIPS standards, the firm is defined as Brown Advisory Institutional, the Institutional and Balanced Institutional asset management divisions of Brown Advisory. As of July 1, 2016, the firm was redefined to exclude the Brown Advisory Private Client division, due to an evolution of the three distinct business lines.
- The Large-Cap Growth Institutional Composite includes all discretionary institutional portfolios (and carve-outs through 2009 invested in U.S. equities with strong earnings growth characteristics and large market capitalizations. This composite has been examined for the periods from January 1, 2006 through December 31, 2009. The examination reports are available upon request. The minimum account market value required for composite inclusion is \$1.5 million.
- Through 2009, cash was allocated to carve-outs based on a strategic asset allocation percentage. For calendar year end 2006-2009, the percent of the composite composed of carve-outs was 85%, 38%, 33% and 5% respectively
- This composite was created in 1997.
- The composite dispersion presented is an equal-weighted standard deviation of portfolio returns calculated for the accounts in the composite for the entire calendar year period.
- The benchmark is the Russell 1000® Growth Index. The Russell 1000® Growth Index measures the performance of the large-cap growth segment of the U.S. equity universe. It includes those Russell 1000® Index companies with higher price-to-book ratios and higher forecasted growth values. The Russell 1000® Growth Index is constructed to provide a comprehensive and unbiased barometer for the large-cap growth segment. The Index is completely reconstituted annually to ensure new and growing equities are included and that the represented companies continue to reflect growth characteristics. The Russell 1000® Growth Index and Russell® are trademarks/service marks of the London Stock Exchange Group companies. An investor cannot invest directly into an index. Benchmark returns are not covered by the report of the independent verifiers.
- Gross-of-fees performance returns are presented before management fees but after all trading commissions, and gross of foreign withholding taxes (if applicable). Net-of-fee performance returns reflect the deduction of actual management fees and all trading commissions. Other expenses can reduce returns to investors. The standard management fee schedule is as follows: 0.80% on the first \$10 million; 0.65% on the next \$15 million; 0.50% on the next \$25 million; and 0.40% on the balance over \$50 million. Further information regarding investment advisory fees is described in Part II A of the firm's Form ADV. Actual fees paid by accounts in the composite may differ from the current fee schedule.
- The three-year annualized ex-post standard deviation measures the variability of the composite (using gross returns) and the benchmark for the 36-month period ended on December 31.
- Valuations and performance returns are computed and stated in U.S. Dollars. All returns reflect the reinvestment of income and other earnings.
- A complete list of composite descriptions, policies for valuing portfolios, calculating performance, and preparing compliant presentations are available upon request.
- Past performance does not indicate future results.
- This piece is provided for informational purposes only and should not be construed as a research report, a recommendation or suggestion to engage in or refrain from a particular course of action or to make or hold a particular investment or pursue a particular investment strategy, including whether or not to buy, sell or hold any of the securities mentioned, including any mutual fund managed by Brown Advisory.
